DETAILED ACTION

The preliminary amendment filed April 28, 2006 has been entered. Claims 16-19 have been newly added.

Accordingly, Claims 1-19 are pending in the instant application.

Election/Restriction

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, Claims 1-6 and 16-19, drawn to a method of treating an animal to reduce body fat by administering a PDE9 inhibitor and a method of treating an animal to reduce food intake.

Group II, Claims 7-9, 14, and 15, drawn to a genetically-modified mouse, a method of making the mouse, and a nucleic acid molecule comprising a PDE9 gene targeting construct.

Group III, Claims 10-13, drawn to a genetically-modified cultured mammalian cell

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons.

The technical feature of the invention of Group I is the PDE9 inhibitor, whereas the technical feature of the invention of Group II is the mutant mouse, and the technical feature of the invention of

Art Unit: 1632

Group III is the genetically-modified mammalian cell, which may be a human cell. Thus, there is no special technical feature linking the inventions of Groups I-III.

Accordingly, Groups I-III are not so linked by the same or corresponding special technical feature as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.
